All you need to know about Thin Skin Lace Wig

Unique Kelly Lace Wigs offers up its thin skin wigs as an ideal solution for clients with extreme hair loss. And here is why.

Thin Skin wigs are made in colors that match a variety of skin shades. So, put against the skin, it is invisible and virtually undetectable to touch.

Unique Kelly Lace Wigs ventilates the thin poly by hand. Also, it uses a looping technique that ensures the hair stays secure longer. As the hair is injected into the thin skin material, rather than knotted, there no knots and the hair appears to grow right out of the scalp.

The thin skin base looks great with a lighter density hair. But since it is not made of breathable material, Unique Kelly Lace Wigs recommends it as ideal for use in temperate regions. In addition to sufferers of extreme hair loss, it is perfect for those who might allergic to lace, another material used to create wigs. As long as the thin skin unit is properly fitted, it can be worn without adhesive. The thin skin option can also be added to any Unique Kelly full lace wig.

What is a Silk Top Lace Wig?

Silk Top Lace front wigs have French or Swiss lace around the border. The top crown contains a piece of silk, usually 4x4 or 5x5 in... We inject hair, strand by strand into fine nylon mesh. As the hair is not secured by knots, the result is a more natural undetectable lace wig system. We then add a layer of flesh-coloured silk material in key lace wig areas. This

means that when the hair is parted it looks more lifelike than a full lace wig and it creates the appearance of a scalp with hair growing out of it. This is a great feature in which the knots are hidden under the silk base.

The Difference between a Silk Top Wig and a Full Lace Wig

Our Silk Top Wigs have a silk base at the front of the wig. The rest of the unit is made up of lace (French or Swiss lace). Here in lies the main difference between silk top wigs, full lace wigs and frontal wigs.

Full lace wigs have lace all around and stretch mesh in the middle. The hair type, texture and colour options are the same as other lace wigs such as lace front wigs, and custom lace front wigs.

Will the Silk Top, on the Lace Wig, Blend With My Skin Tone?

Yes! Unique Kelly Lace Wigs knows that blending is a major concern. So unlike some makers we only offer a very pale flesh tone. That said; we make Silk top wigs in a variety of tones and can match most complexions. Just as we have various lace colours for full lace wigs and front lace wigs, we have flesh colours for Silk Top wigs. Another unique feature, is that our silk top base cap can be coloured to match the scalp, in white, beige, light brown, brown, dark brown and black.

How do I Apply the Silk Top Lace Wig?

The process of applying the silk top lace wig is the same as any lace wig unit. Ours can also be worn in styles such as a high ponytail.

How do I place an order for a silk top wig?

It is so easy. You can order:

1. Securely online or
2. Through representatives in our London; Kent; Leicester.

Fantabulous Clip in Hair Extensions

We make the most gorgeous clip-in hair extensions you will ever wear. Because we make our clip-in hair by hand, ours is also tighter; it looks better and feels thicker. To achieve this, we beat the trend of how extensions are made. Most extensions are made by cutting a single hair weft into several sets. It's a system that leaves the hair so loose and thin, it drops out. **We know you deserve a better extension.** So here is how we make our fantabulous extensions. We hand make each set; then we add more hair to make the set thicker and tighter. Next we bring it together with our exclusive design that cambers each set for an even closer fit. The result; it looks and it feels natural. You must also try on our awesome deep wave and full head extension sets.
